

- 1  
2 **110.** The memory device set forth in claim 104 wherein:  
3 the specifier that is not a network handle has a global form and a local form;  
4 the global form is used in the step of using a specifier that is not a network handle  
5 to determine whether a copy of the particular second object is in the cache; and  
6 the local form is used in the step of obtaining the information from the copy.
- 1 **111.** The memory device set forth in claim 110 wherein:  
2 the global form is a global context; and  
3 the local form is a local context.--

#### Remarks

Applicants have elected one of the sets of claims specified by Examiner for further examination and have thereby complied with Examiner's restriction requirement.

5 Examiner will immediately see that new claims 106-111 add no new matter. The intent of the new claims is to add to the elected claims 68 and 74 dependent claims that have scope similar to the unelected claims 21-23 and 49-52. Since the new claims are dependent from elected claims and add no new matter, Applicants respectfully request that Examiner enter the amendment and examine the elected claims as amended herein.

10 The amendment cancels more claims than it adds, so no additional fees should be required for the amendment; should any be required, please charge them to deposit account number 501315.

Respectfully submitted,

Attorney of record,  
Gordon E. Nelson
